

Minor Observations

1. The browser console displays repeated debug/info logs from TopParksPanel. These should be removed before production release.
2. A chart warning appears where the container width/height is reported as -1 at render time. Although the dashboard still renders data, this should be reviewed to prevent potential issues across different screen sizes.

Feature Comparison: Digicuro vs NovoStack

Area	Available in Digicuro	Missing / Limited in NovoStack
Revenue Trend Graphs	6-month revenue trend, total revenue chart, overall yearly growth trends	No monthly, multi-month, or year-wise revenue trends
Ticket Analytics	Ticket revenue, tickets sold, detailed revenue analytics	Only total ticket count available; no trend analysis
Footfall Analytics	Footfall trends, visitor count, category-wise trends	Only total visitors and basic demographic counts
Comparative Analytics	Quarter-on-quarter, year-over-year revenue comparisons	No quarter or yearly comparisons
Time-Based Analysis	Dedicated time-based analysis section	Not available
Category Trends	Category revenue and footfall trend graphs	Only category-wise revenue split (no trend visualization)
Park Performance Filters	Top-performing parks by revenue, tickets, footfall, activities, F&B	Only top parks by revenue shown
Module-Level Reporting	Separate modules for tickets, activities, parking, F&B, events	Only Dashboard and Tickets sections available
DSR Reports	Daily and FY DSR download options	Not available

Activity / Parking / F&B Analytics	Dedicated reporting modules	No separate analytics; only revenue split shown
Live Visitor View	Real-time visitor count with park-wise breakdown	Only total visitors shown; no live view
Advanced Graph Controls	Multiple graphs with table/graph toggle options	Limited charts; no toggle functionality

Proposed Additions

New Visualizations & Metrics

1. Hourly Footfall – Line chart
2. Revenue per Hour – Line chart
3. Peak Hour Footfall – KPI card / highlight tile
4. Peak Hour Heatmap – Hour vs Day matrix heatmap
5. Payment Mode Split (Cash / UPI / Card / Others) – Donut/Pie chart
6. Weekend vs Weekday Revenue – Clustered bar chart
7. Weekend vs Weekday Footfall – Clustered bar chart
8. Quarter vs Quarter Revenue – Bar chart
9. Year vs Last Year Revenue – Bar chart

Additional Capability

- Data Export Option (CSV / Excel)

Scope Note

Apart from the additions listed above, the rest of the dashboard will remain unchanged and consistent with the current implementation.
